

Maltese Falcon

Maltese Falcon is not just a sailing yacht, it is an enormous sail-driven vessel that, under healthy winds, will rocket to record-breaking speeds. Touted as a new class of yacht, this incredible super cruiser can cross the Atlantic in ten days with guests enjoying some of the most luxurious quarters available from any charter vessel on the market today.

Boasting a revolutionary DynaRig sailing system aptly called the Falcon Rig, this 88 metre behemoth has three self-standing and rotating masts which host fifteen sails for an incredible total sail area of 2400 square metres, all of which can be controlled by a single sailor.
